REVISED CAR PARKING LAYOUT

Monday 28th of March

Dear Parents,

As we settle in to school after our summer break we are reinforcing the revised car parking layout that was implemented in March this year to enable us make further improvements in the area of car parking safety.

We have had tremendous support from parents and huge improvements have been made in the area of car park safety and we hope to continue the same going forward. To enable us to do this we have sought advice on our current parking layout, with particular focus on the perpendicular parking that occurs at present along the middle row of cars.

Perpendicular parking is prohibited in the interest of safety, a one way system with the direction of the middle row of parking facing the school is to be adhered. PLEASE REFER TO DIAGRAM

When you are driving into the car park, please remember to drive slowly and be aware of children running through gaps. All drivers should yield to pedestrian traffic in the car park.

Please park your car in one of the three rows outlined on the attached diagram.

As we have a safe parking policy in place, please only use the Johnnie Fox's overflow car park when the school car park is full, as parking in the school car park is definitely the safest option.

For safety reasons there is no dropping or collecting children allowed in the car park without parking first. We suggest as an alternative drop off point, Johnnie Fox's main car park, where children can walk safely to the school gates without having to cross the road.

As I am sure all parents appreciate, it is in all our children's interest that safety is a priority in the car park.

Thank you in advance for your kind cooperation.
